STATE CORRECTIONS PROFILE

SELECTED CHARACTERISTICS OF ADULT INMATES (as of July 1, 2007)

PROFILE QUESTION

STATE RESPONSE:

Inmates Serving Death Sentences:	5 inmates
Inmates Executed in FY 2007:	0 inmates
Inmates Serving Twenty (20) Years or More:	5,225 inmates
Inmates That Have Already Served Twenty (20) Years of Their Current Sentence:	2,278 inmates
Inmates Admitted Who Were Parole Violators:	3,304 inmates*
* includes returns from mandatory supervision release	
Inmates Released from Custody in FY 2007 for the following:	
Expiration of Sentence	4,543 inmates
Parole	2,934 inmates
Goodtime	6,504 inmates
Probation	0 inmates
Death	62 inmates
<u>Other (court releases and interstate)</u>	<u>881 inmates</u>
Total	14,924 inmates

Method In Which "Goodtime" is Calculated:

Sentence reduced by up to 10 days per month for program participation and institutional behavior.

Is Medical-Early or Compassionate Release Allowed:

Yes

Since 1991, Maryland has allowed inmates with serious medical problems to be released through the medical parole program. Inmates who are granted medical parole have serious medical problems and no longer present any risk to public safety.

Number of inmates released in FY 2007 based on the above: 7 inmates

Inmates Between the ages of 17 and 20: 1,012 inmates

Recidivism rate for total population base 3 years after release: 49.7%

STATE CORRECTIONS PROFILE

SELECTED CHARACTERISTICS OF ADULT INMATES (as of July 1, 2007)

PROFILE QUESTION

STATE RESPONSE:

Number of AIDS Cases:

460 inmates

Number of Inmates Tested for HIV Antibodies

3,200 inmates

Testing of Inmates By Category:

Admission

Yes, voluntary

Random

N/A

Incident

N/A

High Risk Group

Yes, voluntary

Systems Frequency of Testing:

voluntary, risk factors, clinician

Inmates Testing Positive for HIV Antibodies:

605 inmates

The Maryland Division of Corrections does not segregate or isolate HIV-infected inmates.

Number of known Hepatitis C Cases:

1,200

Number of Inmates Being Treated for Hepatitis C:

68

Testing of Inmates By Category:

Admission

Yes, voluntary

Random

N/A

Incident

N/A

High Risk Group

Yes, voluntary

Systems Frequency of Testing:

risk factors, per protocol

The Maryland Department of Corrections does not segregate or isolate Hepatitis C inmates.

The agency protocol for the management of Hepatitis C is upon admission co-morbid conditions and high-risk life style inmates are educated and screened for Hepatitis C.

MARYLAND

STATE CORRECTIONS PROFILE

COURT ORDER REQUIREMENTS

The Maryland Department of Public Safety and Correctional Services has been in a federal consent decree since 1993, but not the Maryland Division of Corrections.

STATE INITIATIVES

Elderly or Infirm Inmates

Maryland has two locations designated as Palliative Care -- 4 beds in Jessup and 2 beds in Baltimore -- in the infirmaries. In other regions there are usually some accommodations made for inmates who are terminally ill and in the infirmary. This is all specific to inmates who have a terminal illness. For inmates who are elderly or infirm who are housed in general population, most institutions try to accommodate their needs by housing them close to the medical and dining areas.

Prison Based Substance Abuse Treatment Programs

Currently, Maryland provides two levels of substance abuse treatment. For inmates with severe levels of addiction, Maryland places them in a modified therapeutic community which is 6-months long. The second type of care is an outpatient level which consists of four hours per week. All of the graduates of the programs, if they are transferred to a pre-release facility where there are staff, have continued aftercare. The programs are funded with General Funds, except for \$450,000, which is Federal Funds from the Governor's Office of Crime Prevention. The Federal Funds will expire in January 2008.

STATE INITIATIVES (continued)

Pre-release/Post-Release ("Reentry") Programs

Maryland Reentry Partnership (REP): The Maryland REP program began more than 5 years ago out of intense concern that not enough was being done to prepare adult offenders to return home as contributing members of their communities.

The Prisoner Reentry Initiative (PRI) began in 2006, with the goal of connecting non-violent male offenders, returning to Baltimore City to stable employment, almost immediately after release from prison. Funded jointly by the federal Departments of Justice and Labor, PRI first tackles key barriers to employment experienced by offenders such as substance abuse addictions, lack of identification documents, poor cognitive skills, and lack of positive peer (or family) support.

The adult offenders participating in these programs represent a substantial risk to the public upon their release. Providing these offenders with services and linkages to increase their ability to function as a non-violent member of their community is crucial to the safety of the public. Within this returning population, about 30% were convicted of a narcotics offense. Most of these offenders will be released under formal supervision. This initiative provided a springboard to an interagency re-entry pilot program that joins together corrections, community, law enforcement, housing organizations, and service providers in a structured process to address the issue of the offenders returning.

These models are specifically designed to strengthen the role of the community as a means of informal social control to address the long-term integration of the offender into the community. Coordinated service delivery and intensive follow-up ensure compliance with the program and reduce opportunity for destructive decision-making.

Concerns with Aging Adult Correctional Facilities

Maryland has 27 total correctional facilities with an average age of 46 years.
