STATE INITIATIVES

Elderly or Infirm Inmates

Nearly 10% of the approximately 52,000 inmates in the Georgia Prison System are age 50 and over. Most old/older inmates are dispersed throughout the system. The most chronic of the older inmates are housed in the Men's State Prison in central Georgia. Georgia also has a medical reprieve process where the Department of Corrections refers certain chronically ill, elderly inmates for medical release to the Parole Board for their consideration. A recent study concluded that in Georgia, an inmate 50 or older is 22 times more likely to need a medical bed than a younger, healthier inmate.

Prison Based Substance Abuse Treatment Programs

The Georgia Department of Corrections has 9-month residential substance abuse treatment (RSATO) programs located in 8 secure correctional facilities. The RSAT program operates within a Therapeutic Community (TC) where offenders have been segregated from the general population. The TC works as an adjunct to the treatment curricula by providing a structured community setting. Georgia Department of Corrections evaluates by measuring three-year felony reconviction rates. Recidivism rates for those in the substance abuse programs are compared with those in the general population.
