STATE CORRECTIONS PROFILE

COURT ORDER REQUIREMENTS

As of June 30, 2008, the Kentucky Department of Corrections was not under a federal or state court order.

STATE INITIATIVES

Elderly or Infirm Inmates

KY DOC has witnessed an increase in the over age 50 inmate population of more than 25% in the past three years. National statistics indicate that the population over the age of 45 is responsible for 67% of all inmate deaths despite accounting for only 16% of the total inmate population. To this end, the KY DOC operates a 55-bed skilled nursing care facility staffed with a full-time physician and nurse practitioner with a full complement of nursing and support staff. In addition, the unit provides a full-time behavioral psychologist and hospice program in coordination with Hospice of Louisville to address end of life issues. The Department receives no additional funding for this population outside of what is allocated to the Medical Division for all institutional medical operations.

Prison Based Substance Abuse Treatment Programs

The KY DOC provides substance abuse treatment within a therapeutic community model in six prisons and fourteen jails. Treatment is offered to male and female offenders. Costs associated with this include \$1 million in legislative funding through the Office of Drug Control Policy and \$1.4 million in DOC budgeted state funds. Inmate treatment population has grown nearly three-fold in three years.

All programs are evaluated via a partnership between the KY DOC and the University of Kentucky Center on Alcohol and Drug Research. Participants are tracked pre-treatment, post-treatment and one year upon release. Recidivism comparisons are based on these trackings and general population recidivism numbers. Results reflect 68% of those inmates receiving treatment in jail programs and 65% of those inmates in prison programs are not incarcerated at one-year follow-up. Of those that were incarcerated, the majority reported being charged with a parole violation. The percent of clients receiving substance abuse treatment in jail or prison who reported using any illegal drug during the 12-month follow-up decreased by over fifty percent from baseline to follow-up.

STATE INITIATIVES (continued)

Pre-release/Post-Release ("Reentry") Programs

The Department of Corrections operates a Pre-Release Program for offenders. It is a 10-day course that is normally conducted 90 days from the offender's release date or parole eligibility date. The Pre-Release Program has been in operation for about 4 years. The program is voluntary. Kentucky has another program, the Home Incarceration Program, where inmates who meet criteria (inmate with no sex or violence charge) can elect to serve the remaining 90 days of their sentence out in the community if they agree to wear electronic monitoring device. They report to a Parole Officer. This allows them the opportunity to get a job and readjust to the community while still under the Department of Corrections supervision.
